PROGRESS REPORT ON PRIORITY DEFICIENCIES OF RESEARCH
by EJC Subcommittee on Population and Manpower
Survey of Research on Sino-Soviet Bloc Population and Manpower

Gaps in Intelligence	Progress to Date
<p>I. <u>CRITICAL DEFICIENCIES</u></p> <p>A. <u>Productivity of Labor</u></p> <p>(Most of the current studies completed or planned by the member agencies are still directed toward estimating basic data on labor force. Only a few studies estimating labor productivity have been possible so far. Important gaps on labor input and output impede the planning and completion of studies on this deficiency. The intelligence community in the past has concentrated on labor force in the USSR, but recently has accumulated data pertaining to the European Satellites, and is now also conducting a major effort on Communist China.)</p>	<p>A. 1. <u>Studies Completed in FY 1959</u></p> <p>Census - <u>The Labor Force of East Germany, 1939-57</u> <u>Producer's Cooperatives in the Soviet Union</u> <u>Electric Power Consumption in the USSR, 1955</u> <u>Manpower Utilization in the Soviet Automobile Industry</u></p> <p>OACSI - <u>Various Military Manpower Studies</u></p> <p>State - <u>NIS 20, Chapter IV, Section 44, Albania - Manpower</u></p> <p>CIA - <u>Labor Supply and Employment in Hungary, 1949-58</u> <u>Economic Implications of the Reorganization of Education in the USSR</u> <u>Labor Supply and Employment in Poland, 1950-56</u> <u>Forced Labor in the USSR, 1953-57</u></p> <p>Labor - "Revitalization of Production Conferences in the Soviet Union", <u>Monthly Labor Review</u>, Dec 1958 <u>Occupational Health Services in the Soviet Union</u></p>

by EIC Subcommittee on Population and Manpower

Survey of Research on Sino-Soviet Bloc Population and Manpower

Gaps in Intelligence		Progress to Date
I. CRITICAL DEFICIENCIES (Continued)		
B. Population and Manpower Resources of Regional Urban Areas	B. 1. Studies Completed in FY 1959	
(Official publication of Handbooks on the national economies of the various republics, oblasts, and krais in the USSR have added materially to estimates of population and manpower of regional and urban areas for the USSR, but great gaps still remain. Materials on the European Satellites and Communist China are still inadequate. Materials on North Vietnam and North Korea are scarce and of low quality.)	Census - <u>The Population of Hungary</u> <u>Projections of the Population of Hungary, 1958-76</u> Soviet Population Distribution Study <u>Projections of the Population of Bulgaria, 1959-76</u>	
	LC - Political and Population Survey (A series of 159 studies is planned, covering major political sub-divisions of the USSR; 69 have been completed, 14 in FY 1959.) <u>Target Data Inventory</u> (one section of this annually revised inventory includes population estimates for each urban target area.) <u>The 1958 Annual Estimates of Political and Demographic Composition of the Sino-Soviet Bloc</u> (data on the population of cities and administrative divisions, as well as over-all data on population and labor force by country.)	
		State - NIS 18, Chapter IV, Section 41, <u>Czechoslovakia - Population</u>

III. OTHER IMPORTANT PROBLEMS	
A. Analysis of Soviet Population Censuses	A. 1. Studies Completed in FY 1959 Census - <u>1959 Census of Population of the USSR: Methodology and Plans</u> <u>The U.S.S.R. Census of Population, 1939: Organization and Methodology</u> <u>Estimates and Projections of the Soviet Population, 1950 to 1976</u>
(The census of population conducted by the Soviet government in January 1959 is expected to result in the release of a great amount of data, especially on the age and sex distribution of population and on the labor force in the USSR. A major effort is currently being made, principally in the Census Bureau's Foreign Manpower Research Office to be prepared for study of the Soviet census results. AIR and CIA are providing major support in this effort.)	2. Studies in Progress in FY 1960 Census - <u>Population Registers in the USSR</u>
B. Analysis of Chinese Population Data	B. 1. Studies Completed in FY 1959 CIA - <u>Controls on Population Growth in Communist China</u>
(The Census Bureau, supported principally by AIR, is currently beginning a major effort on analysis of available data on China. Great gaps of information are still apparent.)	2. Studies in Progress in FY 1960 Census - <u>The Urban Population of Mainland China</u> <u>Estimates and Projections of the Population of Mainland China (1953 to 1975)</u> <u>Size, Composition and Growth of the Population of Mainland China</u> <u>Framework for Analysis of Expected 1959 USSR Census Results</u>
